1953-1963

Mirabile visu! What a transformation — for I remember addressing you on Freshman Orientation Day. You then appeared as frightened undergrads. Now, you have acquired poise, dignity, and stature.

Throughout your four years here, you have labored long and hard. This is the process of molding you into a finished product so that you may take your rightful place as a member of one of the health professions.

Your curriculum was lengthy and full. Yet, when comparing your education with that of 41 years ago, we note that tremendous changes have occurred: new discoveries, new materials, new

techniques, new equipment, high speeds, the antibiotics, and the stressing of basic sciences and research. You are fortunate to have been educated in this rapidly changing era.

It is always hazardous to predict the future — and I remind you to be prepared. For you are now enrolled in a life-long school to continue keeping pace with the new. Do not let yourselves sink into obsolescence. Being prepared means a brilliant future.

You are my last graduating class. It was a pleasure to have known you. My heartiest congratulations and blessings to all of you.

**E. G. VANDEN BOSCHE**  
**Professor of Biochemistry**

To those who have known him, he is the personification of dignity, honor, and professional attitude. We grew to love and respect him for his impartiality, integrity, friendliness, and warm interest in each student. The devotion which he manifests toward his work, to the Baltimore College of Dental Surgery, and to the student is truly admirable.

It is in a spirit of gratitude and hope that our dental careers will reflect his inspiration that the Class of 1963 dedicates its yearbook to

## *The Freshmen*

On the dreary and wet morning of September 17, 1962, ninety-nine men and a young lady assembled to hear about the oldest dental school in the world. We were to be the last freshman class to be greeted by Dean Aisenberg before his retirement.

After the first Anatomy exam, everything began to settle into its proper place. We found that several new experiments were being tried on our class. During the first semester, our only Anatomy lectures were in lab, and we had two extra hours on Friday afternoon to get to know our cadaver better. A memorable way to get acquainted with the other members of our class was our highly successful class party before Thanksgiving.

Just when we were really beginning to enjoy ourselves, February brought more eight o'clock classes and five o'clock labs, and a greater amount of midnight oil-burning for an unceasing string of exams. But February also brought fraternity rushing, and a substantial number of our class joined one of the Greek letter groups. Then came spring and Neuro; and finally the last exam in June prior to a much needed rest.

As we look back we remember—an article about our class secretary in the *Sunpapers*; “How can I spend six hours doing what Dr. Ramsey did in fifteen minutes?”; the protein lectures and exam; “I think that the labio-lingual diameter is about 0.3 mm off”; “The free surfaces of the body are covered by *epicelial* tissue”; “Follow your dissector and clean it up a little better”; and Dr. Seipp’s hundred-minute lectures in fifty minutes.

*First Row:* J. P. Green, Bianca, DeLuca, DiSabatino, Broadrup, Conaty, Bravos, Berman, J. C. Green, Bronstein.

## *The Juniors*

The two years of preclinical study passed, and how we anticipated the challenge of the clinic! We had been told there is a great transition from the manikin to the patient; how right they were! The manikin never missed an appointment, but then it never smiled and said, "Thank you."

It was a good feeling to don the white clinic gown, even though it fit like a tent. We were finally going to start, but after two hours of trying to put on a rubber dam, we wondered if there would be time to prepare the cavity.

When the Christmas season approached, it was definite that there were going to be many happy denture wearers, or many more impressions. As the days and appointments slipped by, we began to realize that points really *were* important, because without them, we would never have the opportunity to diagnose pathology.

We heard about Preventive Dentistry, and reasoned its several meanings while removing mutilated fingers from a pedo patient's mouth. After anesthetizing our first lip, we knew the value in, "Head back, *open* please."

When the final weeks of this transition year were closing in, we worked to the sound of humming burrs, the reaming and filing of a root canal, the scaling and polishing of teeth. Will our years as dentists be as stimulating and challenging as this past year?

We, as neophytes, have accepted the successes and failures of the Junior Year and are looking forward to the Senior Year at BCDS, and the future years in the dental profession.

1. "... pale, homogeneous, glassy, translucent ..."

2. "But, Dr. Warner, the guys under the table can't see!"

3. "Is this the palate, sir?"

4. "I hope I'm in the control group today."

5. "I wonder why the acrylic is turning brown."

6. "First time I ever had one cry on me."

# Juniors

1. "Shhh! I'm supposed to be on assignment."
2. "This is as close to him as I'm gonna get."
3. "What the heck, let's leave my temporary on."

4. "I guess I shouldn't have flamed this paper point."
5. "This was a pedo patient when I started."
6. "I hate to tell him he's checking off the wrong tooth."

STANLEY HYATT                      HENRY VAN HASSEL

As we began our senior year in the summer of 1962, we started with great enthusiasm, eager to "get ahead" and look forward to the spring when we would be able to relax before graduation. But for most of us, we were still trying to finish our requirements before the "cut-off" date.

Even though we may have had our close calls, we could look back to a most enjoyable year and one that we shall always remember. We'll never forget Public Health Dentistry where we learned all about "statistics" and looked forward to our weekly letter to the mayor. We remember the early assignments to Mercy Hospital to put our knowledge of Internal Medicine to use. And then there was OPD.

Yes, the Class of 1963 would never have believed that four years of dental school could have passed so fast. Now that we are graduating, we can look back and see the changes that have occurred in our four years. We can enjoy the memories and anticipate the future in the armed forces, internships, graduate studies, or private practice.

We are looking forward to future successes, and know that we must set our hearts to the tasks we love.

# *Honorary Senior Class President*

WILBUR OWEN RAMSEY  
Professor of  
Dental Prosthetics

The Department of Dental Prosthesis has the distinction for the second consecutive year of having the graduating class extend to a member of its department the honor of becoming the Honorary Senior Class President.

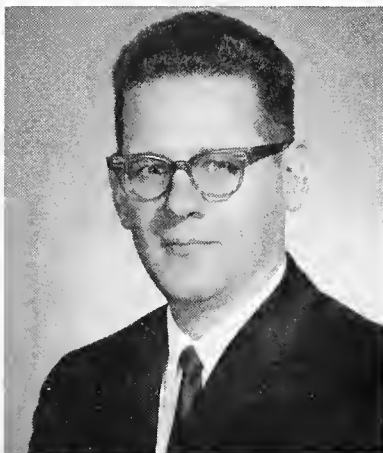

Dr. Wilbur Owen Ramsey is a man truly deserving of this honor.

His abilities and devotion as an educator, scientist and teacher exemplify the finest traditions of American dental education. His personal feelings, pleasant manner and genuine interests have made him a friend of every student.

It is with a spirit of gratitude and pride that we, the Class of 1963, elect Dr. Ramsey as Honorary Class President.

Gardner Patrick Henry Foley has distinguished himself in the past thirty-five years as a devoted friend of dentistry.

An outstanding authority on Dental History, Mr. Foley has graciously imparted his knowledge, not only to his students, but also to the entire dental profession. As the head of the Department of Dental Literature, he has patiently spent many hours advising students with their theses. As the faculty advisor to THE MIRROR, his aid has been invaluable. He has established himself as a true friend of the student as a member of many school committees.

We thank you, Mr. Foley, for your devotion and interest in our school and profession.

Membership in the Gorgas Odontological Society signifies outstanding academic achievement and leadership in our school and in our profession. Each year, invitations for membership are given to those juniors who stand in the first thirty percent of their class.

The Society, formed in 1916, is named in honor of Dr. Ferdinand J. S. Gorgas, an outstanding graduate of the school who was a widely recognized leader in the field of dental education.

Monthly meetings afford members educational benefits beyond the outlined dental school curriculum through the presentations of guest speakers. Each year at the spring formal senior members are presented with a key and certificate. The faculty advisor is Dr. Jose E. Medina.

# Student Senate

## OFFICERS

<i>President</i> .....	JOHN PENTZER
<i>Vice-President</i> .....	JAMES CAREW
<i>Secretary-Treasurer</i> .....	DEAN JOHNSON

The Student Senate was organized eleven years ago with the primary objective of serving as a liaison between the student body and the faculty. It also tries to promote and maintain harmonious student-faculty relations and considers any problems that may exist and recommends solutions. In addition, the Student Senate contributes to student life and activities. Five dances are planned for the school year, including the Student Senate Mixer, three class dances, and the senior banquet and dance. The Senate also administers a short-term loan fund. Tournaments are annually scheduled in bowling, basketball, and softball, under its direction.

# Interfraternity Council

The purpose of the IFC is to create and maintain interfraternal feelings throughout the student body and impartially govern those activities of the fraternities connected with school regulations. The Council is composed of the presidents and vice-presidents of each of the dental fraternities.

The main function of the IFC is the supervision of the annual rush period. The Council also contributed to the bowling, basketball, and softball leagues. Each year, the IFC awards a trophy to the senior who is voted by his class as having been most outstanding in student activities during the four years at dental school.

This year's officers were Dave Bimestefer (PsiO), president; Stuart Landsman (SED), vice-president; Frank Richo (ZIP), secretary; and Marty Narun (AO), treasurer.

## BOWLING CAPTAINS

## PSI O CHAMPIONS

The bowling season started with the eight teams all feeling confident. The faculty, led by Dr. Sanders and Bob Whitney, was listed as the team to watch.

SED broke in front and remained in first place most of the year with ZIP I a strike away. At the close of the season, dark horse PsiO I overtook everyone to end the season in a tie with ZIP I, and won the playoff to become champions.

As the season progressed, it became evident that the bowlers were a dedicated group. Nothing interfered with the Thursday night games. Tests were moved, weather was changed, and wives and babies were left crying.

The year was capped by an award party at the ZIP House. Awards were presented to Harvey Wildman, highest average; John Pentzer, high set; and Ralph Jacobson and Nick Russo, high game.

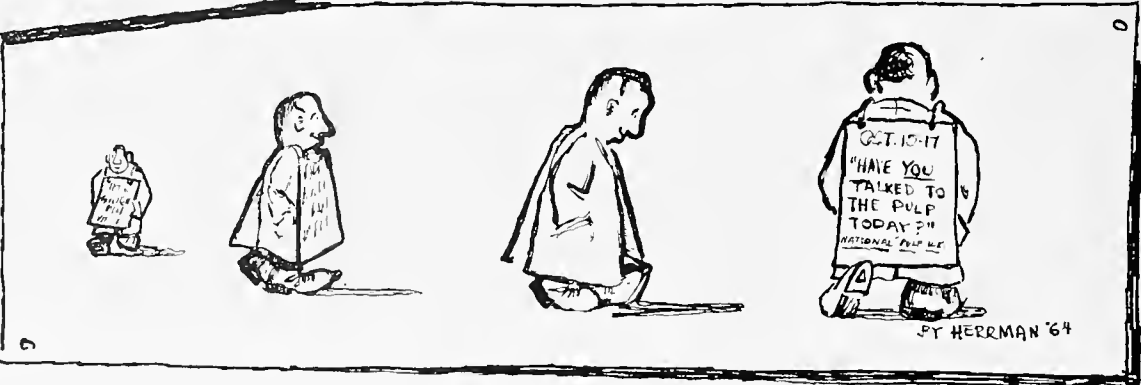

Informal basketball and softball games were also played during the year.

# Prosthetics

"Open please. PLEASE!!!"

"I wish he would write so I could understand it."

"If an instructor doesn't come over soon, I'll scream!"

"Let someone else do the lowers, Dr. Warner. I only need one unit."

# Prosthetics

"Gee, I'm sorry, Mrs. Brown. It fit the cast beautifully."

"You're in the wrong department, son. He's got teeth."

"He comes in for adjustments every two weeks."

"So that's what an indelible pencil is for!"

# Crown and Bridge

"Nawman never satisfied."

"What do you mean it's all right? I just told him to do it over."

"I hope I can get this cemented before Ernie comes."

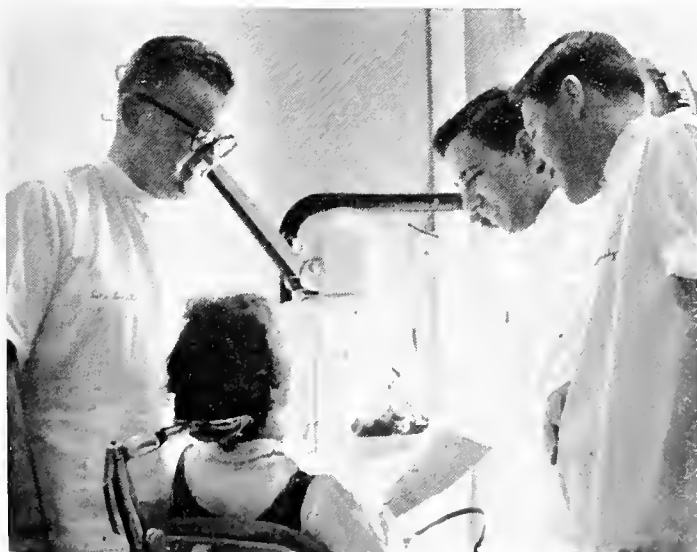

"But can't I do something, Doctor?"

# Diagnosis

"The barber shop is across the street."

"You guys can take your break now."

"And this, boys, is called a foil patient."

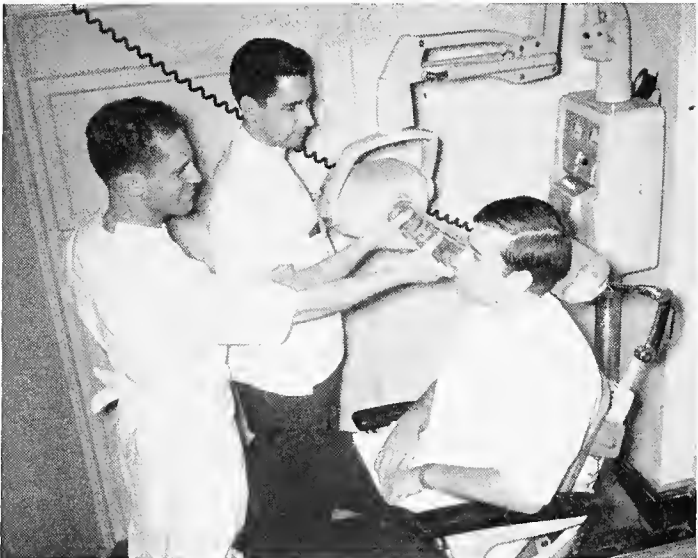

"Hmmm!! I can use him for foils, endo, and surgery."

# Roentgenology

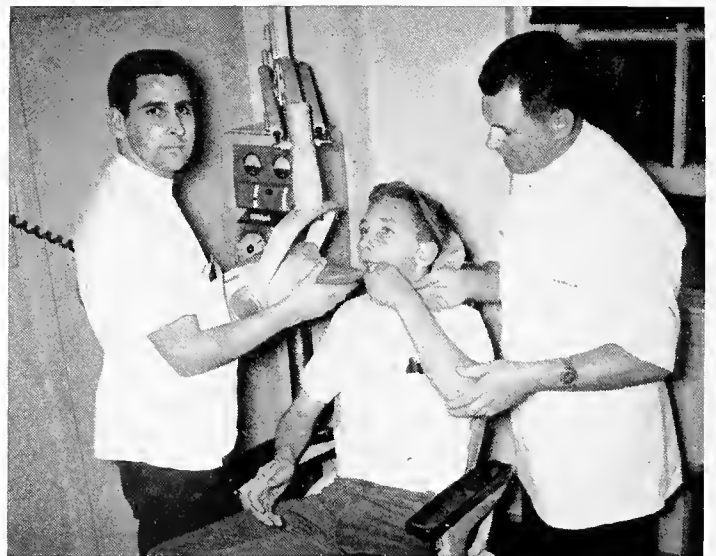

Long Cohen or short Cohen technique?

Friday afternoon treatment.

"Little Jack Horner sat in a corner . . ."

"Hey, watch where you're pointing that thing!"

# Pedodontics

Katz's Kittens.

"Is this what you call *fetor oris*, Doctor?"

"Ohhhh, Dr. Joe!!"

"Let me know when the tooth starts to melt."

# Operative

"They'll never be able to tell the foil was cemented."

"I must be doing something wrong. All the instructors have been watching me."

"Hold still while I spot-weld this inlay!"

Another two hours wasted.

# Operative

"Get away, you guys! She's *my* patient!"

"Those darn parallel pins kill me!"

"I wish this stuff would set up. It's been 45 minutes already."

"Who's got some Elmer's glue?"

# Oral Medicine

"I'm sorry, Madame, I *have* to ask these questions."

"I just finished endo."

"Did you get her phone number?"

"After you finish this one, we'll let you start on the *big* chart."

# Surgery

"What was that cracking noise, Stan?"

"Did I ever tell you fellows about the prison guard I had once who . . ."

"I think I just elevated my fingernail."

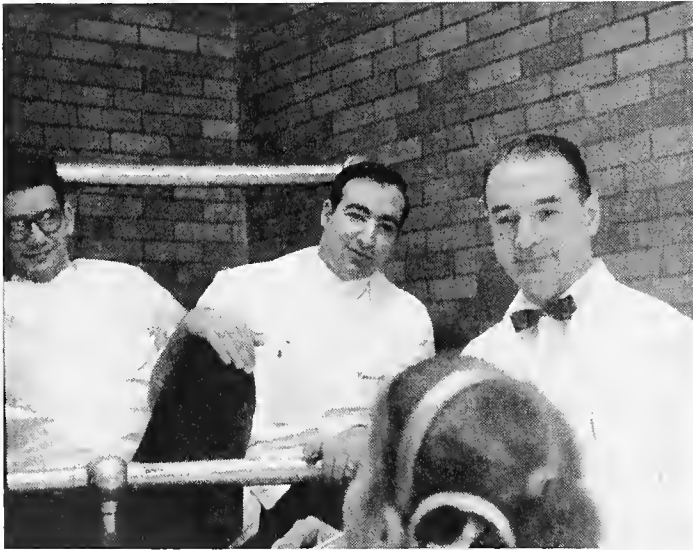

"You know, I *am* good!!"

# Orthodontics

"Serial extractions don't hurt — much!"

"You *like* crooked teeth?"

"Notice how she bites my finger?"

"This is a hopeless case. I guess I'll just show you how to mix Jeltrate."

# Features

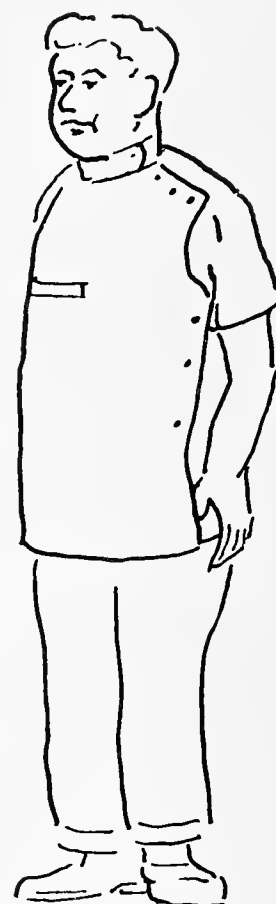

# The Dental School

This is the dental school. People learn to be dentists here. It is a very famous school. Color it famous.

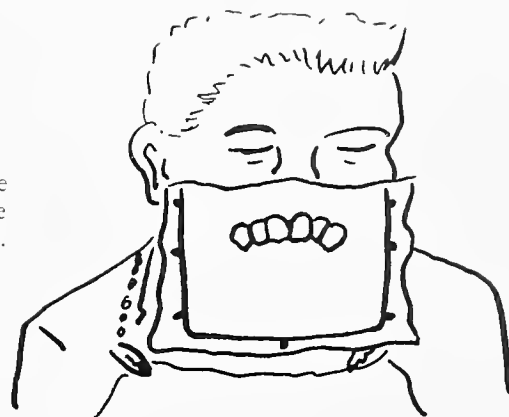

This is a student. Color his gown white. Color his pants white. Color his shoes and socks white. He is in the wrong school. He is a medical student.

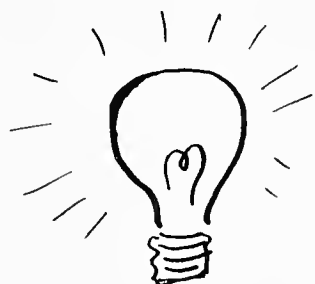

This is a unit in the operative clinic. It has a water spray and an air spray and a saliva ejector which doesn't work. Color the unit green.

# Coloring Book

This is a patient in the operative clinic. He has been wearing a rubber dam for three and a half hours. Color *him* green, too.

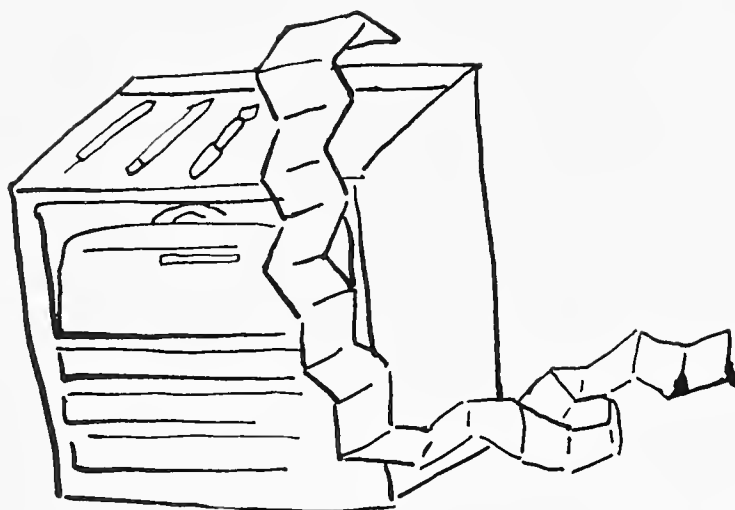

This is a "section" in the operative clinic. See the empty chairs. See the empty cabinets. They are always empty. Color them empty. This must be Dr. Medina's section.

This is a light bulb in Dr. Beaven's section. Color it burning brightly.

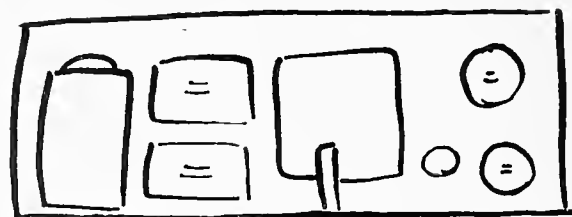

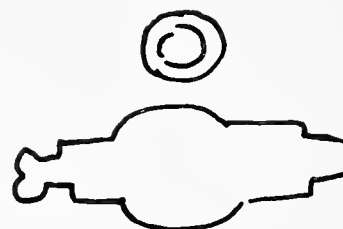

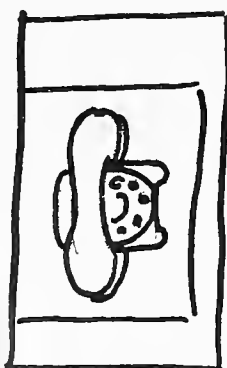

# The Dental School

This is a chair in the Pedodontic clinic. It is a blue chair. Color the little boy in the chair blue, too. Dr. Sanders has just demonstrated the "towel technique."

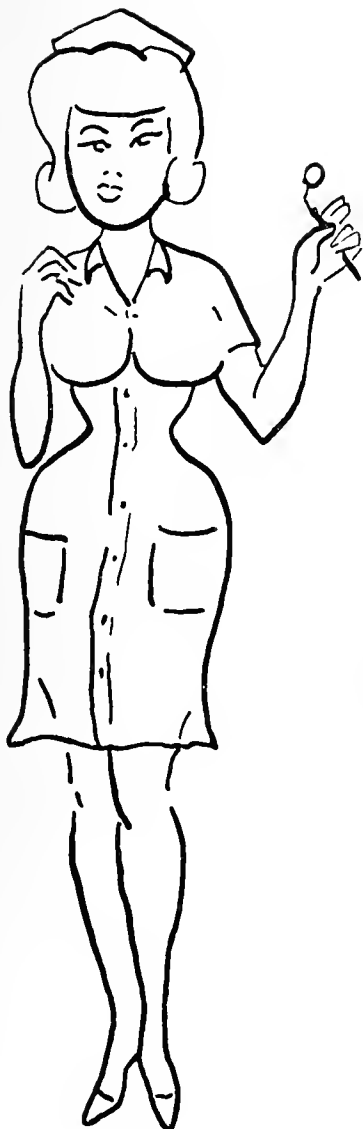

This is the Oral Medicine clinic. We are learning more and more periodontics by doing. A student has been filling out this Perio chart for five days. Color all the pens out of ink.

This is the Surgery clinic. We use many different kinds of instruments here. The most frequently used instrument is on the desk. Color the telephone black.

# Coloring Book

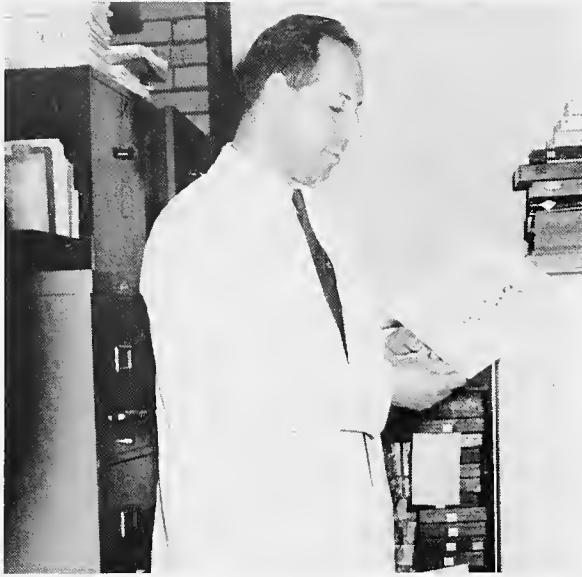

This is a dental assistant. She is very pretty. She always wants to do her best to assist the student. Would you like her to assist you? Then put down your crayons.

This is an instructor in the Prosthetics Department. He is a very nice man. He always tries to help us. Color the Acrylic monomer he is pouring for the student Film-Ac. Then color his face red.

## 2 Outstanding Contributions to Dental Education and Practice

### COLUMBIA DENTOFORMS

**F**ROM a humble start 43 years ago Columbia Dentoforms have played an increasingly important role in dental education. Today every dental student in the United States and Canada "cuts" his first teeth on Dentoforms, for we supply Dentoforms to every dental college in the U. S. and Canada and to many in other lands.

In these 43 years there have been many improvements and additions to Dentoforms to meet the ever more exacting demands of teachers. Today, Dentoforms number more than a thousand and present conditions the student will encounter in practice. And in graduate years, Dentoforms continue to help clinicians in postgraduate education and to help the busy practitioner in his endless task of patient-education by showing the better dentistry he seeks to give.

### BROWN ATTACHMENTS

**B**ROWN Precision Attachments have been used successfully since 1920, when patents were granted to their inventor, Dr. I. Brown. This event followed by only a few years the impetus that Dr. Herman Chayes gave to the advance in removable restorations by the introduction of the precision attachment.

So simple, yet so effective and practical are the design and mechanical principles employed in Brown Attachments, that they have defied every effort to improve upon them for 43 years. Except for the addition of the proximal contact, to give the convenience of a built-in proximal contact, no change in design has been made. The sizes of the Brown Attachments made today are identical with those made 43 years ago—a comforting thought, if replacement parts are required.
